

**2012 *Biostatistics***

<i>Biostatistics 001</i>	Table of Contents
<i>Biostatistics 002</i>	Guide to Tests
<i>Biostatistics 010</i>	Introduction
<i>Biostatistics 020</i>	Descriptive Statistics
<i>Biostatistics 030</i>	Summary & Graphic Display of Data
<i>Biostatistics 040</i>	General Strategies for Sampling a Population
<i>Biostatistics 050</i>	Standard & Conditional Probability
<i>Biostatistics 060</i>	Determining Risk for Families using Pedigree Analysis
<i>Biostatistics 070</i>	Probability Distributions
<i>Biostatistics 080</i>	The Normal Distribution
<i>Biostatistics 090</i>	Assessing Data Normality
<i>Biostatistics 100</i>	Repeated Sampling: Distribution of Means and Confidence Intervals
<i>Biostatistics 110</i>	The Formal Logic of Statistical Tests
<i>Biostatistics 120</i>	One Sample t-Test
<i>Biostatistics 130</i>	Estimating Power and Sample Size for a One Sample t-Test
<i>Biostatistics 140</i>	One Sample $\chi^2$ Test of Variance for a Normal Distribution
<i>Biostatistics 150</i>	Paired t-Test
<i>Biostatistics 160</i>	Two Sample t-Test for Populations with Equal Variances
<i>Biostatistics 170</i>	Testing Equal Variances in Two Populations
<i>Biostatistics 180</i>	Two Sample t-Test for Populations with Unequal Variances
<i>Biostatistics 190</i>	Estimation of Sample Size and Power in t-Tests for Two Samples
<i>Biostatistics 200</i>	Sign Test
<i>Biostatistics 210</i>	Wilcoxon Signed-Rank Test
<i>Biostatistics 220</i>	Wilcoxon Rank-Sum Test & Mann-Whitney Test
<i>Biostatistics 230</i>	One-Way Analysis of Variance with Fixed Effects Model: Generating the ANOVA Table & F-Test
<i>Biostatistics 240</i>	Welch's F-Test for $H_0: \text{All } \alpha_i = 0$ in One-Way ANOVA with Fixed Effects Model
<i>Biostatistics 250</i>	Multiple Pairwise Comparison Procedures in One-Way ANOVA with Fixed Effects Model
<i>Biostatistics 260</i>	Linear Contrasts in One-Way ANOVA with Fixed Effects Model
<i>Biostatistics 270</i>	Kruskal-Wallis Test

<i>Biostatistics 280</i>	<b>Bartlett's Test for Homogeneity of Variance</b>
<i>Biostatistics 290</i>	<b>Two-Way ANOVA for Fixed Effects with Equal Sample Sizes</b>
<i>Biostatistics 300</i>	<b>Two-Way ANOVA without Replication</b>
<i>Biostatistics 310</i>	<b>Multi-Factor ANOVA Models</b>
<i>Biostatistics 320</i>	<b>Nested Two-way ANOVA Model for Balanced Data</b>
<i>Biostatistics 321</i>	<b>Cross-Nested Two-way ANOVA Model for Balanced Data</b>
<i>Biostatistics 330</i>	<b>Friedman Two-Way Analysis of Variance by Ranks Test</b>
<i>Biostatistics 340</i>	<b>Cochran's Q Test for for nominal scale data in Randomized Blocks or Repeated Measures Designs</b>
<i>Biostatistics 350</i>	<b>Simple Linear Regression</b>
<i>Biostatistics 360</i>	<b>ANOVA F-test/t-test for Simple Linear Regression and Interval Estimation</b>
<i>Biostatistics 370</i>	<b>Association and Correlation in "Simple" Regression</b>
<i>Biostatistics 380</i>	<b>Multiple Regression</b>
<i>Biostatistics 390</i>	<b>General Linear Models and "dummy" Coding</b>
<i>Biostatistics 400</i>	<b>Linear Modeling &amp; "Extra" Sums of Squares</b>
<i>Biostatistics 401</i>	<b>Choosing an Optimal Linear Model</b>
<i>Biostatistics 402</i>	<b>F-Test for Model Comparison</b>
<i>Biostatistics 410</i>	<b><math>\chi^2</math> Test for Goodness of Fit</b>
<i>Biostatistics 420</i>	<b>G-test for Goodness of Fit</b>
<i>Biostatistics 430</i>	<b>Kolmogorov-Smirnov Test for Goodness of Fit in an ordered sequence</b>
<i>Biostatistics 440</i>	<b>2 X 2 Contingency Test of Association</b>
<i>Biostatistics 450</i>	<b><math>\chi^2</math> &amp; G Tests for Association in RXC Contingency Tables</b>
<i>Biostatistics 460</i>	<b>Fisher's Exact Test</b>
<i>Biostatistics 470</i>	<b>McNemar's Test for Paired Data</b>
<i>Biostatistics 801</i>	<b>Getting Started with the R Interpreter</b>
<i>Biostatistics 901</i>	<b>R Scripts</b>
